

Requirements for the Internet bandwidth

More than 1 Mbps download speed and 64 Kbps upload speed

Requirements for other hardwares

Microphone

Speaker

The setup of Skype :

Step 1: Download and install

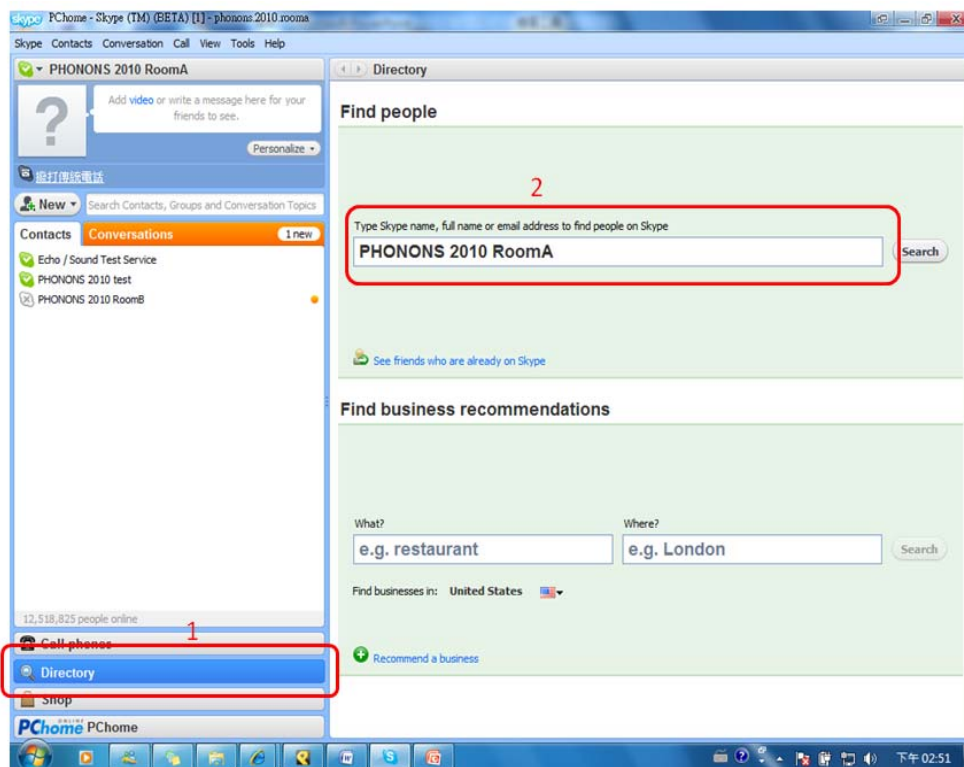

Select an appropriate version of Skype for the operation system of your personal computer from the official website:

<http://www.skype.com/intl/en/download/skype/windows/>

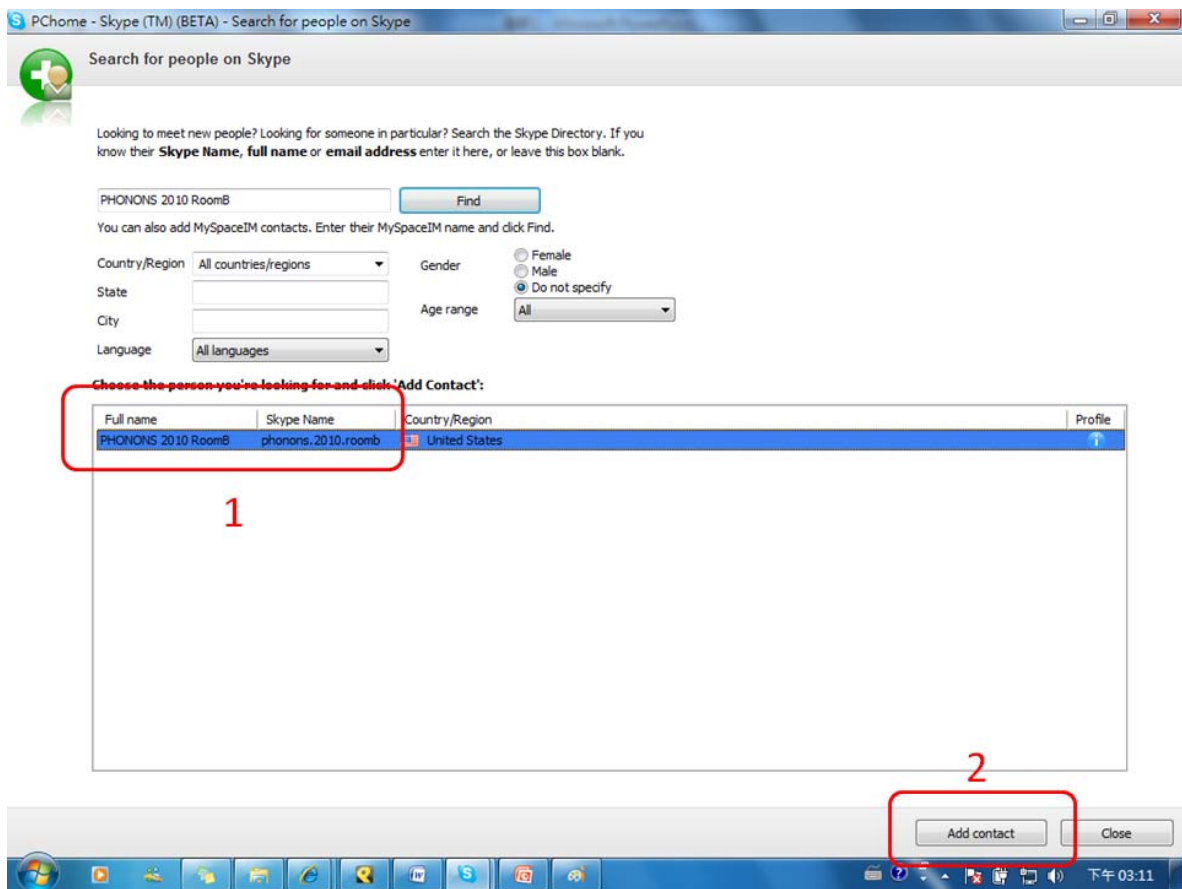

Step 2: Start the program and create your personal account

Step 3: Add PHONONS 2010 on Skype in your contact list

Select the “Directory” icon and search for the Phonons2010 Skype accounts: “PHONONS 2010 RoomA”, “PHONONS 2010 RoomB”, and “PHONONS 2010 test”.

Select those conference accounts and add them into your contact list

Up to now, the Skype should be successfully installed and the conference accounts are in your contact list. You can call the conference account “PHONONS 2010 test” to perform the connection test.

If you have encountered any problem, please contact our multimedia conference staff r94941032@ntu.edu.tw.
